

6 Months Recovery Summary

Can be printed
to fill out by
hand or filled
in digitally.

1 of 7

A recovery summary should be completed by a clinical nurse specialist with the patient and used to holistically assess recovery after a stem cell transplant. Promoting formal assessment of physical recovery and encouraging conversations around mental wellbeing and finding the right support to aid in transplant recovery. We recommend that this begins at **six months**, is repeated at **one year**, and then annually.

A copy of this document should be given to the patient, and further copies sent to their referring hospital and GP.

Name of patient: _____ NHS number: _____

Date of birth: _____ Consultant: _____

Key Worker name and contact details: _____

Diagnosis: _____

Brief treatment summary and admissions post-transplant (briefly include reason and length of stay):

Quality of life assessment completed: YES NO (if yes, please attach a copy)

6 Months Recovery Summary

Sexual function (discuss physical and emotional concerns, body image and experience of pain)
Pain (include symptoms of peripheral neuropathy)
If applicable discuss concerns regarding: Fertility (include safe sex advice) / Menopause (if not discussed, please state why)

Post-transplant vaccinations

The timing of vaccinations will depend on the patient's individual recovery from transplant. In addition, each transplant centre might do things slightly differently and may begin the vaccinations at different time points. It's important to discuss the vaccination schedule with the transplant team.

Post-transplant vaccinations	YES	NO
Have post-transplant vaccinations been discussed?		
If no, please state why:		
If yes, has a referral to GP been made with letter and copy of vaccination schedule?		
Has the patient been given a copy of the vaccination schedule and vaccination record?		
Have vaccines been discussed?		
Flu		
MMR		
COVID		

What other healthcare professionals are involved with their care?

- Physiotherapist Occupational therapist Dietician Psychologist Counsellor Psychiatrist
