

# Annual Recovery Summary

  
Can be printed to fill out by hand or filled in digitally.

1 of 7

A recovery summary should be completed by a clinical nurse specialist with the patient and used to holistically assess recovery after a stem cell transplant. Promoting formal assessment of physical recovery and encouraging conversations around mental wellbeing and finding the right support to aid in transplant recovery. We recommend that this begins at **six months**, is repeated at **one year**, and then annually.

A copy of this document should be given to the patient, and further copies sent to their referring hospital and GP.

Name of patient: \_\_\_\_\_ NHS number: \_\_\_\_\_

Date of birth: \_\_\_\_\_ Consultant: \_\_\_\_\_

Key Worker name and contact details: \_\_\_\_\_

Diagnosis: \_\_\_\_\_

## Brief treatment summary and admissions post-transplant (briefly include reason and length of stay):

saving the lives  
of people with  
blood cancer

**Skin health** (promote skin and sun protection and the use of factor 50 sun cream)

**Cardiovascular health**

**Respiratory health** (include smoking and smoking cessation advice)

**Gastrointestinal health** (include diet and bowel function, advise on healthy eating/weight and alcohol intake)

**Renal health** (Include fluid intake, frequency and urgency of passing urine)

**Bone health** (assess risk of osteoporosis and symptoms of avascular necrosis)

**Sexual function** (discuss physical and emotional concerns, body image and experience of pain)

**Pain** (include symptoms of peripheral neuropathy)

continued...

If applicable discuss concerns regarding:  
**Fertility** (include safe sex advice) / **Menopause** (if not discussed, please state why)

**Secondary cancer screening** (encourage symptom checking, promote following the national screening programmes and advise on when to start mammogram screening)

## Post-transplant vaccinations

The timing of vaccinations will depend on the patient's individual recovery from transplant. In addition, each transplant centre might do things slightly differently and may begin the vaccinations at different time points. It's important to discuss the vaccination schedule with the transplant team.

Post-transplant vaccinations	YES	NO
Have post-transplant vaccinations been discussed?		
If no, please state why:		
If yes, has a referral to GP been made with letter and copy of vaccination schedule?		
Has the patient been given a copy of the vaccination schedule and vaccination passport?		
Vaccinations completed		
Have vaccines been discussed?		
Flu		
MMR		
COVID		

What other healthcare professionals are involved with their care?

- Physiotherapist  Occupational therapist  Dietician  Psychologist  Counsellor  Psychiatrist  
 Dermatologist  Respiratory  Gastroenterologist  Psychosexual therapist  Endocrinologist  
 Cardiologist  Gynaecologist  Other:

What other sources of support are being accessed?

- Maggie's Centre  Macmillan Centre  Anthony Nolan online forum  Hospital or local support group
